PRESS RELEASE

Bandar Seri Begawan, 25/02/2019

Bruneian Software Development and IT Consulting firm Nuara Group announced as WSIS Prizes 2019 Champion.

Prize announcement and ceremony to be held on 9th April 2019 in Geneva, Switzerland.

Out of 1064 nominated ICT success stories from around the world, following a comprehensive review by the Expert Group, of 1140 projects submitted by the WSIS Stakeholders' community, **Nuara Group's Project - Nuara E² - Effective and Efficient** was among those **top five** most voted in the Category 8: **ICT Applications/ E-business** for and nominated as a runner up at this year's **WSIS Prize 2019**.

The World Summit on the Information Society (WSIS) Prize contest is a United Nations-sponsored global initiative recognizing innovative projects using information and communication technologies (ICTs) to better the world. This year marks their 10th anniversary where the contest serves as the platform for identifying and showcasing the success stories across the WSIS Action Lines defined in the Geneva Plan of Action and Sustainable Development Goals (SDGs). The summit is to be held from 8-12 April 2019 in Geneva, Switzerland during which WSIS Champions will be awarded with a Champion's certificate from the ITU Secretary-General and the 2019 WSIS Prize Winners will be announced.

The **Nuara E²** project consists of two phases: Firstly, to develop a comprehensive Enterprise Resource Planning (ERP) software suitable for Small, Medium Enterprises (SMEs). The software is of modular nature and available features range from HR Management to Inventory and Warehouse Management, Sales and Order Management, to Asset Management. All modules can be integrated with each other, allowing companies to efficiently streamline their business operation by providing them with a one-stop solution through which one can manage orders and inventories, track open jobs, document necessary procedures and monitor and manage resources and materials to ensure sustainable consumption and production patterns.

Nuara E² provides a fully customizable tool through which the sustainable use of resources is ensured thus promoting lean and efficient operations with the result of improving productivity and overall efficiency.

The second phase of the project focuses on encouraging the adoption of innovative and digitized solutions amongst SMEs in Brunei and the South East Asian region by providing technological education paired with consultative advice to businesses on the suitable use of digital solutions as part of the company's daily operations to identify key value creators, add value and create sustainable efficiencies.
